**DONOR MILK DRIVE AND CELEBRATION**

**IN PARTNERSHIP WITH MOTHER'S MILK BANK**

When a baby is born extremely premature, a mother sometimes doesn't produce enough breast milk for the baby. Donated breast milk can provide important protection for these fragile babies and help prevent a potentially fatal condition called necrotizing enterocolitis (NEC).

- Learn about breast milk donation.
- Get screened to be a donor.
- Donate your milk.
- We will accept properly stored milk at the event.

**Friday, September 25, 2015**  
**10:00 am - 2:00 pm**

Santa Barbara Cottage Hospital  
Women's Services Conference Room

For more information call: **805-569-8250**
